

Taylor Vance

taylor.vance@ml-corp.net | +1 (555) 432-1098 | Seattle, WA

Professional Summary

Innovative Machine Learning Engineer specializing in model development, optimization, and API deployments. Skilled at taking prototype algorithms and scaling them to production using containerization and clean REST API boundaries.

Technical Skills

Languages & Frameworks: Python, Scikit-learn, TensorFlow, PyTorch, FastAPI, SQL

Data Processing: Pandas, NumPy, Scipy

MLOps & Cloud: Docker, MLflow, AWS (EC2, S3), Git, GitHub, CI/CD

Professional Experience

Machine Learning Engineer | Apex AI | 2024 - Present

- Built and optimized predictive models using Scikit-learn and XGBoost.
- Wrapped models in asynchronous FastAPI services to serve live inferences with under 50ms latency.
- Containerized applications using Docker to facilitate deployment to AWS cloud environments.

Projects

End-to-End Model Tracking Pipeline

Implemented MLflow to track model hyperparameters, validation metrics, and weight checkpoints. Automated deployment builds using Git version control and GitHub Actions CI/CD.

Education

M.S. in Computer Science | University of Washington | 2022 - 2024
